## Introduction

First Response Australia Pty Ltd is a medium size registered training organisation, which provides an integrated proactive approach to the issues of First Aid, Emergency Care and Workplace Health & Safety. Our market segments include Marine, Medical, Security, Aviation, Mining, Tourism, Government, Aged Care, Education and Child Care, Retail, Sporting Clubs, variety of small to large Businesses and the General Public to name a few.

The company began operations in Cairns in 1989 to provide a variety of Emergency Care and Pre-Hospital Care programs and courses and has expanded nationally and internationally to facilitate the unique and individual programs of our key client's businesses along with providing Specialist Emergency Care and Medical Equipment to meet every situation.

First Response Australia Pty Ltd is approved by Queensland Health to carry a range of paramedical drugs under protocol and operate a paramedical service (approval PAR007842819) for on-site medical coverage and services.

Our Paramedics and Advanced Emergency Medical Technicians (AEMT's) are fully trained and accredited and have extensive experience in an industrial and public environment. Protocols and procedures are reviewed and governed by a Medical Advisory Panel and a Medical Director.

Our strategy also includes providing skilled Workplace Health, Safety and Environmental Consultants who can design, implement and communicate basic to specialist WHS service. This has enabled us to build further relationships with our clients that has ensured our growth and capabilities.

First Response Australia Pty Ltd provides services depending on the requirements of the client. We have extensive experience in the following areas:

- \* **Emergency Care Training** - all levels from First Aid to EMT/Paramedic
- \* **Specialised Emergency Care Training adapted to specific industry** – Advanced Emergency Medical Technician (AEMT), Emergency Care First Responder / Remote Area Emergency Care / Low Voltage Switchboard Rescue / Cyanide Poisoning Management
- \* **Specialist Emergency Care Equipment & Product** – Oxygen / Defibrillation / Stretchers / Medical Kits / Trauma Hospital Equipment / Haemostatic Agents / Diphoterine
- \* **After Sales Service** - all major brands of Emergency Medical and Trauma equipment
- \* **On-Site Emergency Medic Support** – Paramedics and EMT's to cover a wide range of applications
- \* **Workplace Health, Safety and Environmental Consultancy** - Our skilled HSE Consultant has designed, implemented and communicated basic to specialist WHS both nationally and internationally

## Pre-qualification

First Response Australia Pty Ltd is a nationally Registered Training Organization RTO 5919 that operates under the scope of health.

All our trainers are qualified to the standards of the Australian Quality Framework (AQF) and the current or equivalent in the training they are providing. The trainer to student ratios will be appropriate for the level of course training that is being offered.

## Quality Assurance

We operate a Business Management System that complies with the Australian Quality Framework QA system.

## Accreditation and Certification of Courses

All training is accredited to Australian Quality Framework (AQF) Standards. Participants who attend and complete satisfactory course assessments will be awarded the relevant certification. First Response Australia is a Registered Training Organisation and under Commonwealth Law complies with the Standards laid down and governed by the Australian Quality Framework. First Response Australia also provides non-accredited training, tailored to specific industry requirements.

## Director's Profile

### Charles Makray – Managing Director

[charlie@firstresponseaustralia.com.au](mailto:charlie@firstresponseaustralia.com.au)

Charles Makray commenced First Response Australia Pty Ltd over 30 years ago, and since then, First Response Australia has issued qualifications to over 70,000 participants. Charles Makray's passion and commitment to delivering community and industry first aid and emergency care training has led to the building of a dynamic qualified and committed team of over 13 professionals.

First Response Australia Pty Ltd found that rescue emergency personnel had inadequate skills in the initiation of primary treatment and management to the sick and injured prior to the arrival of the recognised clinical professionals. First Response Australia also recognised that many primary response units had personnel in dangerous and precarious situations during the day-to-day operations of their organisation especially in remote areas.

As the key developer, Charles Makray (Director) and his team has created programs, which have focused on meeting the needs of workgroups, community groups and individuals domestically and internationally. The pinnacle course being the Certificate IV in Pre-Hospital Emergency Medical Response 10734NAT.

The Certificate IV in Pre-Hospital Emergency Medical Response 107347NAT is the only 'Emergency Medical Technician' program that is accredited to Certificate IV level in Australia. To achieve this accreditation, FRA had to undergo the most rigorous process including the development of unique industry-based competencies in consultation with expert groups from:

- Aviation
- Maritime
- Resource
- Mining / Security
- Paramedical
- Tourism / Adventure

Over the last 30 years, First Response Australia has listened to the needs of the industry and as a result, a selection of courses has been created to provide participants with a range of knowledge, skills and generic and specific competencies for the provision of required emergency care management of patients in many environments.

Competency comprises the demonstration of the knowledge, values and skills and the application of these cognitive, affective and psychomotor components to the standard of performance required of emergency care personnel.

The Director's determination to provide a quality service to industry, recognised that many of environments require emergency care equipment, which represents best and current international practice, quality assured and specific to the requirements of the users. The Director and the team at First Response Australia travel extensively throughout the year to research and test a selection of emergency care equipment to distribute to various organisations.

To further meet the needs of the industry, First Response Australia are also providers of Medic Services for Industry and Events throughout North Queensland.

### **Trainers/Facilitators:**

Experienced and professionally recognised trainers, medical personnel and administration officers complement our organisation.

Our trainers all hold qualifications and industry experience in the programs they deliver as well as the training qualifications of the Certificate IV in Assessment and Workplace Training or higher. The team participate in regular professional development and have demonstrated comprehensive knowledge of the programs in which they train and assess.

Trainers participate in program validation at regular intervals to ensure materials are of a high standard and meet industry benchmark requirements. Program evaluations are provided to all participants seeking feedback on the course material and outcomes.

## Current Clients:

### *Mining*

### *Government*

### *Tourism*

### *Other Industries*
