

Event MEDICS

With the sports, recreation and event industries being potentially dangerous and quite unpredictable, ensuring the correct level of medical care is supplied can make all the difference to the success of your event.

First Response Australia is the preferred supplier of event Emergency Medical Services for many businesses and community groups in the Cairns region. We have built our reputation over many years, by providing a consistently prompt, professional and reliable service to private events, sporting matches and community fairs, to name a few.

Event Organisers Duty of Care

Organisers of events in Queensland have a duty of care to provide a safe environment for all involved. FRA will conduct a medical risk assessment which determines the level of care required for your event, based on the type of event, the venue plan, etc.

Our Team

We have a great team of highly trained and accredited Advanced Emergency Medical Technicians and Advanced Care Paramedics, supported by Medical Direction and Emergency Physicians. Staff are assessed and tested annually to ensure their competency in managing a wide variety of medical scenarios - from minor cuts to cardiac arrest.

Medications/Vehicles

Our fleet of emergency vehicles are fully stocked with a comprehensive range of medical supplies and equipment. As a recognised Emergency Medical Service, we can carry a range of medications, meaning we can quickly reduce pain from accidents and other causes, as well as treat a full range of respiratory, cardiac and medical emergencies.

Why Choose Us? The service we provide is so much more than a first aid officer or volunteer first aid services can. First Aiders are usually very limited in their response and service delivery, and often unable to provide anything other than basic first aid, such as treatment of minor cuts and scratches.

Response equipment includes but not limited to:

Full Emergency Drug Kit
Oxygen Resuscitation Kit with ResQPODs & CardioPumps
Advanced Airway Management Equipment
Intravenous Fluid Therapy and Intraosseous Equipment
Spinal Immobilisation Equipment including full body mattress
Mechanical CPR Device

By engaging First Response Australia's services, you substantially minimise delays or interruptions to your event due to unforeseen incidents.

In many cases our highly qualified personnel can treat on site reducing the need an Ambulance call-out.
